

Chiayo Victory 2000 Sound System

The Chiayo Victory 2000 is a 75 watt self-contained sound system that runs off of internal batteries or worldwide AC (GFCI outlet only). It is available with choice of optional CD/mp3 player with remote control, and wireless microphone(s). A single Victory 2000 with accessory underwater speaker is perfect for competitive swimming in a 25 yard pool, or synchronized swimming in a 50 meter pool. For competitive swimming in a 50 meter pool, a Victory 2000 with Lubell underwater speaker can be used at one end of pool, and a Victory Slave with another Lubell underwater speaker can be used at the other end of the pool, providing excellent sound coverage to swimmers and spectators alike. Victory has built-in wheels and telescoping handle for ease in transport from pool office to deck.

The Victory 2000 has unswitched external speaker jack and "switched" external speaker jack, allowing connection of the optional underwater speaker. When the underwater speaker is connected to the "unswitched" jack, then the built-in air speaker produces sound along with the underwater speaker. When the underwater speaker is connected to the "switched" jack, then the internal air speaker shuts off allowing underwater sound only.

FEATURES

- Made in Taiwan R.O.C.
- Rugged aluminum enclosure with built-in telescoping handle and wheels
- 2 year warranty on amplifier and wireless mic; 1 year warranty on CD player
- Built-in rechargeable batteries run 3+ hours on a charge. **100V-240V 50/60Hz world voltage.**
